Your New Xooma Website is LIVE!

The wait is over. Xooma's online 'storefront' to the world has been completely transformed. So, head on over to your Xooma.com website and check it out today.

How to benefit from your new website:

- 1. Learn it:** The new Xooma website is loaded with valuable information. From in-depth product knowledge to an overview of our lucrative reward opportunities, you'll also get a look at our corporate team & culture. This new website has it all. So don't just scroll through the pictures – take some time to READ the content on your website. Not only will you learn some valuable new information, but you'll also become an expert at helping others find the information they're looking for on Xooma.com.
- 2. Share it:** In today's world, many people will initially 'judge' a company based on the appearance of its website. And to be honest, Xooma's previous website was getting a little outdated. But now we have one of the best looking and most vibrant websites in the entire health & wellness industry. You can be proud to share your new site with others and help them discover the time-tested & proven benefits of Xooma's products as well as our referral rewards.
- 3. Send it:** If you've been a Member with us for a few months or more, you've probably shared Xooma with many other people. As a result, several of them have most likely visited our original website. Perhaps some of those people have not yet made the decision to either try our products or become a Member of your team. With your NEW website, however, you have the perfect opportunity to share Xooma again. The all-new Xooma.com is just the start of many more exciting things to come in Xooma's future. For us, it's a re-launch of our company to the 'online world'. For YOU, it's the perfect excuse to **send a link** to your new personalized Xooma website (via email, text, or social media messaging) and re-introduce Xooma to everyone you know.

Like all websites, Xooma.com will continue to grow, evolve, and improve in the weeks and months ahead. Be sure to visit your website regularly as we continue to add more support information & tools to help you enjoy better health and more financial abundance through your Xooma Membership.

The multivitamin 'skeptics' are WRONG

The most popular type of dietary supplement consumed in the U.S. is a daily multivitamin. Why? Well, most people now believe it's a smart decision based on their own knowledge & research. Plus, many doctors now recommend

taking a good multivitamin to most of their patients. Yet, there are still some misguided health 'experts' in the world trying to

convince us that multivitamins are 'useless' or a 'waste of money'.

These vitamin supplement skeptics claim that we can get all the nutrients our bodies need from the foods we eat. Sadly, they are wrong. *Here's why...*

First, your food cannot provide all the nutrients your body needs if it's grown in soils that are depleted of the key minerals and organic matter needed to produce strong healthy plants. Decades of studies have confirmed that today's farmland is severely nutrient depleted and is continuing to get worse with every passing year. And so, our modern food supply no longer provides the same level of vitamins and minerals as it did in previous generations.

Second, the multivitamin skeptics falsely believe (or assume) that our society eats a healthy diet and already consumes the recommended daily amounts of fruits, vegetables and (*continued on next page*)

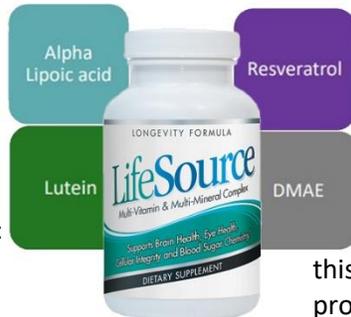

The multivitamin ‘skeptics’ (continuation)

grains needed for optimal health. Sadly, nothing could be further from the truth. In fact, one of the reasons we have so much illness and disease in our world today is because so many people are consuming ‘junk foods’ on a regular basis. Canned, boxed, and processed foods with chemicals & preservatives now fill our grocery carts. Fast food meals from a drive-thru and Door Dash deliveries have become part of our standard weekly diet. Unfortunately, these meals DO NOT provide the critical vitamins and minerals we need daily.

So, unless you’re eating nothing but organic fruits & vegetables, non-GMO grains, and wholesome, pasture raised, non-hormone/non-antibiotic injected meats...you NEED a high-quality multivitamin/multimineral formula as part of your daily health regimen. Fortunately, Xooma offers one of the best, premium quality, top performing supplements in this category – **LifeSource**.

Unlike the low quality, cheap multivitamins on your local store shelves, LifeSource has so much good and honest nutrition packed into our exclusive formula that our daily

dose requires four capsules. Within that daily dose you don’t get just the RDA (Recommended Daily Allowance) level of basic nutrients, you get the ODI (Optimal Daily Intake) of a full spectrum of vitamins and minerals the body needs each day. In addition, LifeSource uses bio-available nutrient sources and includes key ‘anti-aging’ ingredients to support brain health, eye health, blood sugar chemistry and cellular integrity.

There’s no better multivitamin/multimineral supplement value on the market today than Xooma’s LifeSource. With your Member discount, your cost is just \$1.58 for a daily serving (4 capsules). Outside of X2O water, this is one of the most important foundational products you should be taking for daily health.

If LifeSource is not part of your current health regimen, we encourage you to order a bottle this month and discover the difference it can make in your life.

SMART TIP: Your COVID Defense Plan

pharmaceutical options still leave us at risk for contracting this horrible virus.

Regardless of how you personally feel about the vaccines and booster shots (*pro or con*), it’s become abundantly clear that we still need to do everything we can to stay healthy and keep our natural immune system as strong as possible. While medical and pharmaceutical remedies/procedures definitely play a role in helping us stay alive during a health crisis, it’s still **your responsibility** to make smart health decisions and practice prevention.

So, in addition to eating a healthy diet and exercising, Xooma has several key products that can help keep your immune system healthy and strong. First on the list is **X2O™**. Staying properly hydrated, getting essential trace minerals and neutralizing acidity with that alkaline X2O water are all helpful in eliminating toxins and keeping your body healthy. Next is **Silver MAX™**. This powerful yet simple natural solution is rooted in centuries of use around the world. For hundreds of years, silver has been used as an effective anti-viral, anti-bacterial and anti-fungal remedy inside (and outside) the body. Xooma’s Silver MAX takes that age-old wisdom and combines it with modern nutraceutical technology to create a powerful ally for your natural immune system. Finally, our **Probiotix™** product is designed to help improve your overall gut health by adding BILLIONS of friendly microorganisms to your GI tract. And since approximately 70% of your body’s immune system is found in your gut, Probiotix helps to keep your immune system strong and vibrant.

We call this combination of products the ‘**Triple Shield of Protection**’ and you can learn more about it in the ‘Product Info’ section (found under the ‘Training & Marketing Tools’ tab) in the Member’s portal of your Xooma.com website.
