

Joint Health™ has new look and premium patented ingredient

You'll notice that your next order of Joint Health has a great new look. And the formula that you've grown to love and depend on is almost the same, with one improvement. We've upgraded the formula with a premium, patented ingredient that's known as OptiMSM®, *at no additional cost to you.*

You might not be aware that sulfur is the fourth most abundant mineral found in the human body. Well, 34% of OptiMSM's makeup includes sulfur

- a versatile nutrient that supports healthy, active lifestyles and benefits multiple structures and functions within the body, *including connective tissues and the respiratory system.*

Here's another benefit for improved health: Several pre-clinical and clinical studies support the efficacy of MSM in supporting joint health and range of motion. Research shows that MSM reduces inflammatory markers that damage cartilage as we age, *protecting its integrity.*

'Joint Health' continues to be an outstanding product in Xooma's line that countless Members around the world have grown to trust for giving them relief from joint pain and strain. Not only is this new formula designed to deliver even greater results within the body, it's offered at the same low price to you. *Just another example of Xooma's value promise!*

Put this exclusive formula to work for you. **Order Item #1137** this month.

Robin is happy to be home!

After some time away, Robin Blakely is happy to be back home with Xooma Worldwide!

Robin believes life is a journey. Convinced by a friend that the 'grass was greener' at another direct selling company, Robin resigned from Xooma over a year ago. Her journey allowed her to see first-hand how other companies operate, the products they offered and how their compensation plans worked. During this process, she shares that somehow she knew in her heart she would come back home (to Xooma).

Well, we're proud to announce she's back! Robin shares that she truly missed Xooma's... *(continued on page 2)*

Xooma Track & Go goes LIVE in June

Xooma's new Track & Go APP is going LIVE the first half of June on both Android devices and iPhone devices. Stay tuned for the release date! Soon you will be able to utilize this cutting-edge App that allows you to get the most out of your Xooma products by helping you monitor your daily usage.

Once you program your Track & Go app with your personal 'vital statistics', it can then help you track your personal X2O Water consumption and your Xooma product usage.

To tailor it specifically for your needs, all you do is input your height, weight, health goals, and selection of Xooma Products that you use and when you use them.

Xooma Track & Go will provide you with your Personal Daily Hydration Goal and also remind you when to take your Xooma Products. Now you can reach your personal health goals through Xooma's exclusive products with this fun and interactive app. *Stay tuned for the "Going Live" announcement soon!*

Prescription meds versus natural?

Xooma Member, Jim Colangelo, found out just how different it was to try a prescription drug after successfully using FocusUP for more than a year.

A member of his family suggested he try a prescription drug for mental performance to 'save money' because he could purchase the drug with just a \$4 co-pay. Reluctantly, Jim gave it a try.

After visiting his doctor, he was prescribed Adderall. But here are some of the side effects he experienced after only 5 weeks: dry mouth, always being thirsty; craving coffee again in the morning; noticed he couldn't breathe deeply and had never experienced this before in his life. After doing some research online, he found that one side effect showed a potential correlation with congestive heart failure. Wow!

The good news is Jim stopped the Adderall and is thrilled to be taking FocusUP again. He discovered that the \$4 co-pay may have saved him a few dollars but it also came with many unpleasant side effects (*Adderall has 25 side effects listed*). Wise decision, Jim!

June only - Silver MAX™ Special!

It might not be cold and flu season, but you want to keep your SilverMAX handy – the liquid AND the gel. That's why we put together this money-saving SilverMAX Combo for the month of June.

Most Members know how helpful it is to have SilverMAX on hand during the winter months – especially during cold and flu season. But, have you thought about all the ways SilverMAX might come in

handy during the summer months?

SilverMAX liquid is great for eye irritations in the summer. You can also use the nasal mister for help with allergies... especially when they continue past 'allergy season'.

If you spend any time in the sun, SilverMAX (gel or liquid) is ideal for fast healing of sunburn and other minor burns. It can reduce topical pain that accompanies sunburn and also help calm minor skin inflammation.

Summertime also means more flying insects, including mosquitos, horse flies, and other biting insects. SilverMAX Gel is ideal for bug bites and skin irritations.

And for those minor 'accidents', you'll be relieved to have SilverMAX on hand. For minor cuts and skin infections, SilverMAX Gel is the age-old 'antibiotic' that promotes the healing of skin.

Check your medicine cabinet for a few over-the-counter (OTC) products that can all be replaced with just one product, SilverMAX. Here's a few: OTC antiseptic cream, burn spray, calamine lotion and acne cream.

Safeguard your health by boosting your immune system during the summer months – inside and out – with this SilverMAX Combo special.

Order Item #2499 for the Silver Combo: 8 oz. bottle SilverMAX and one 2 oz. bottle of SilverMAX Gel, for just **\$49.97**. That's a savings of \$27.48 off the retail price!
(Good through Tuesday, June 30th)

Don't forget the 'Silver Kit' for just \$4.99 more!

Robin is happy... (continued from page 1)

products because she had experienced such great results with them. Famous for her Xooma weight loss success story, she said she hoped she could keep the weight off by being away. Robin admits it was much harder, but she did maintain her weight.

Here's some of her story and what she originally faced, before X2O was introduced to her, along with several other Xooma products.

"About 8 years ago, I weighed 282 pounds. For my height (5' 4") this was considered overweight based on my BMI (Body Mass Index). I was always tired, and according to my doctor I was at risk of developing diabetes. He told me I needed to change my diet and begin exercising to resolve my problems. Exercise has never been my favorite thing to do, but I was just too plain tired, and resolved that my declining health was just my destiny. And being overweight, my feet would hurt if I walked longer than 10 minutes.

Around this time I was gifted a little sachet called X2O, and noticed right away that I was less stressed. A few weeks later I started noticing that I was not as tired and could focus, and more energy continued to return. I no longer needed my daily cup of coffee in the morning... and started taking brief walks in the afternoons! From there, my walks became longer and I began taking other Xooma's products, including the MetaboWize System. Now, it's 8 years later and 160 pounds lighter...and I've kept it off!"

Robin shares that we are all on the 'journey of life' which can take us in many directions. And while her journey took her to some unexpected places, she is grateful to be welcomed back 'home' with open arms by everyone in the Xooma Family.
