

# Probiotix

*Just ONE capsule of Probiotix each day is all you need.  
Plus, Probiotix doesn't need to be refrigerated, making  
it even more convenient.*

## What IS Xooma's Probiotix?

- Probiotix supports ideal levels of good gut bacteria for a healthy digestive system and strong immune system.
- Xooma's Probiotix is a multiple strain probiotic formula to support ideal gut health.
- This exclusive formula contains 12 of the most important, clinically researched strains to provide optimal results.
- Contains NO gluten, NO dairy, and NO soy.

## 30 Billion what?

- Probiotix contains 30 billion CFUs per capsule.
- CFUs are Colony Forming Units – that represent the good or 'friendly' bacteria.

## Probiotix contains probiotics AND prebiotic fiber.

- **Probiotics** help move food and waste material through your gut, while also providing benefits to many other parts of the body.
- **Prebiotics** are important because they increase the growth of beneficial bacteria in our intestinal tract and nourish the gut lining.

## Advanced Probiotic Protection with CSP™ Activ-Vial™ Tech

- New active material science technology built into Probiotix vial (bottle) is proven to protect probiotic stability.
- Activ-Polymer™ liner completely surrounds the capsules to scavenge moisture and create the microclimate needed to ensure probiotic potency.

## Should I take this supplement?

- The importance of probiotics is tied to your digestive health and immune support systems.
- Here are some interesting statistics:
  - ✓ 70% of your immune system is located in your gut.
  - ✓ 90% of your serotonin (responsible for appetite, mood, sleep and relaxation) is synthesized in your gut.
  - ✓ You have more bacteria (approximately 100 trillion microorganisms) in your gut than you have cells in your body!

## A wide variety of adverse health issues can be linked to an unhealthy balance of gut bacteria.

- There are approximately 40 diseases that have been linked to bacterial imbalance in the body, according to the National Institute of Diabetes and Digestive and Kidney Diseases.
- An imbalance of good bacteria can affect the following areas: gastrointestinal, nutritional deficiencies, skin conditions, autoimmune diseases, hormonal problems and more.

## Quick Overview

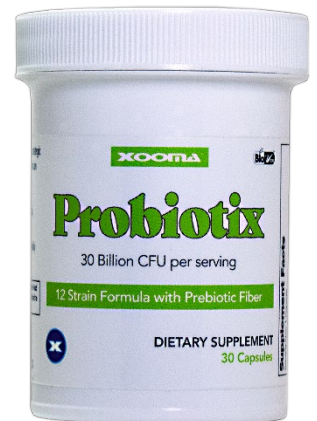

### Supplement Facts
