

X2O Plus

FACT: Most people simply don't consume enough minerals to meet their body's needs.

If you're like most Xooma Members, you love transforming your drinking water into a powerful health beverage with X2O sachets. Thanks to all the health benefits people experience from X2O, it's been our #1 selling product for over 20 years. But here's an important question...**are you getting enough?**

Sadly, most people in our modern world are mineral deficient. And since your body can't make minerals, you **MUST** get them from your diet and supplementation. That's why so many people start to see positive changes when they infuse all those essential trace minerals into their water with X2O sachets. However, for many people, their body needs **MORE** of those amazing X2O minerals than they are currently getting. **Here are some reasons WHY...**

Some people only use one X2O sachet per day. Using X2O in your water is always a smart choice...but if you are mineral deficient, one X2O sachet simply can't provide all the minerals your body needs on a daily basis. Less X2O = less mineral intake each day.

Some people require a much higher level of mineral intake due to the physical demands they put on their body. Whether you're an athlete, weekend warrior, someone with a job that requires regular physical activity, someone who works in hot temperatures, or you simply enjoy exercising (running, biking, swimming, weight training, etc.) – you **NEED** more minerals. Physical activity 'burns up' a lot of our essential minerals & electrolytes which is why we need to keep fueling our body with enough of them to keep up with that demand. If this sounds like you, even 2 or 3 sachets of X2O in your water each day may not be enough to supply *all* your body's mineral needs.

People admit that they don't drink much X2O treated water in the evening. Over the years many people have confessed to us that they purposely avoid drinking a lot of water in the evening to reduce their need to get up in the middle of the night to use the restroom. And while that is a legitimate reason to reduce your water intake, *again*, less X2O water = less mineral intake each day.

The bottom line is we need to be consuming minerals every day...and most people simply don't consume enough to meet their body's needs. And that's why we created **X2O Plus**!

X2O Plus takes the same premium marine-based mineral complex found inside your X2O sachets and refines them into a powdered version that can be taken inside a capsule. Plus, there's more exciting benefits in this new formula.

Quick Overview

X2O™ Plus

Mineral complex with vitamin D3 & K2

Suggested Use: Take 2 capsules, preferably in the evening, with pure water.

Serving Size: 2 Capsules

Servings Per Container: 30

Vitamin D3: An impressive amount of high-quality Vitamin D3 at 5000 IU per serving.

K2VITAL

K2VITAL is a patented, 99.7% all-trans K2 MK-7, identical to the K2 molecule found in nature and fully bioactive so you get the best possible benefits.

More Magnesium to provide the ideal 2:1 ratio of calcium to magnesium for best performance within the body.

To order X2O Plus:

Item# 8140 Bottle of 60 vegetarian capsules
Retail price: \$38.95 **Member price: \$29.95**

WHY this formula works:

X2O Mineral Complex

- Healthy additional dose of those amazing trace minerals found in X2O (1500 mg) without needing to drink a large amount of water - especially in the evening.

Vitamin D3

- Helps absorb more calcium
- Supports a healthy immune system and heart
- Supports proper muscle and brain function
- Supports strong bones and teeth

Vitamin K2

- Acts to direct calcium where it needs to be in the body
- Works with Vitamin D3 to fight mineral deficiency
- Aids in proper blood clotting
- Linked to reduced risk of coronary heart disease
- Helps build & maintain healthy bones

Magnesium

- Involved in hundreds of biochemical processes in the body, including stress response
- Supports many health benefits, including better sleep
- Supports bone health & bone mineral density
